

HAROLD PATRICK  
**RECRUITMENT**  
Manufacturing & Renewable Energy

**CNC Programmer - Miller / Milling**

Union, NJ

1st Shift

Permanent

\$30-40 p/h +o/t

An immediate start is available

Please note, any applicants must be US Citizens or hold a valid Green Card due to the company's customer base.

Would you like to work for a fast growing Precision Engineering company?

We are currently recruiting a CNC Programmer, due to expansion and increased workload.

A skill set including CNC Programming, Milling, Process Faultfinding, Design & Planning is essential

Applicants will have previous experience as a CNC Programmer, CNC Machinist, CNC Operator or CNC Technician in a precision CNC Machining environment

Production runs Monday-Friday and a degree of flexibility is expected

Full training on the company's specialist equipment will be included but it is expected that any applicants will be experienced CNC Programmers with sufficient CAD/CAM skills having worked with steels

Applications will only be considered from experienced CNC Programmers, this is not an entry level position

It is essential that any applicants are fully skilled in setting up 4 or 5 axis CNC Milling machines and potentially running multiple changeovers per shift

Salary will be based upon skill set with candidates having Supervisor experience attracting a higher rate

Benefits include 401(k) match, Tuition Reimbursement, plus Medical
