

HAROLD PATRICK
RECRUITMENT
Manufacturing & Renewable Energy

PLC Controls Engineer

Philadelphia, PA

\$80,000-100,000 depending on skills and ability

Would you like to work for a company with a long history in metal forming / processing who pride themselves on the longevity of their employees? Of course you would!

We are currently recruiting a Controls Engineer, which is a newly created role supporting the Engineering Director

Duties include including PLC Programming (Siemens or Allen Bradley), Process Controls, HMI Development, Elec / Mech troubleshooting, Metal Forming, System Design

Note, any applicants will ideally hold a Bachelors Degree in a related area (Automation, Controls, Electrical Engineering etc) and have spent 5+ years in a similar role (this is not entry level)

If you are from a Metal Forming, Casting, Forging, Smelting type background then that would be beneficial

As this is a hands-on role, you will be expected to be on the shop floor if necessary as everyone helps out

Contact us asap - (302) 307-4899 - andy@haroldpatrick.com
